

BEFORE YOU BEGIN

For the most accurate wrist size, review your printer settings first. Page Scaling should be set to “none” and the PDF prints at 100%. To confirm the accuracy of the printout, measure the one-inch or three-centimeter markers in the sample box below. If this does not match exactly, your wrist measurement will be inaccurate.

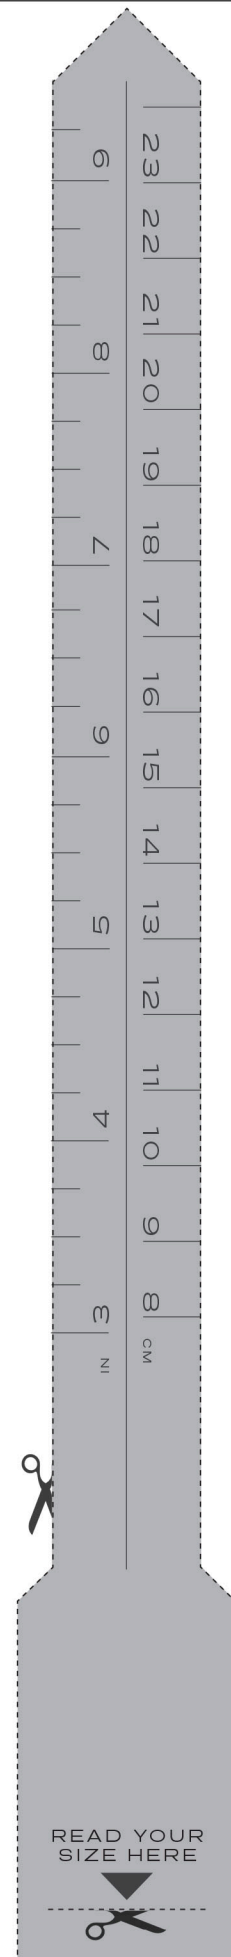

HOW TO MEASURE YOUR WRIST SIZE

- 1 Print the Wrist Size Guide and cut out the paper wrist sizer.
- 2 With the number markers on the outside, curl the wrist sizer into a circle and carefully insert the pointed end just through the small opening at the end.
- 3 Place your hand through the wrist sizer and gently pull the pointed end through the slit until the wrist sizer fits comfortably around your wrist.
- 4 The number that lines up with the arrow is your wrist size. If the measurement is between two sizes, refer to the larger size.

ADDITIONAL NOTES

This wrist sizer will give you an approximation of your wrist size and measurement. Bracelet and watch fit may vary depending on the type of bracelet or strap.

If you are using this wrist sizer to measure your wrist for a Cartier Love Bracelet, Cartier recommends adding one centimeter for a tight fit and two centimeters for a loose fit to your final measured size. This adjusted size accounts for the elliptical shape of the Cartier Love Bracelet.
